CI-30 Student Technology and Internet Acceptable Use Policy

The schools in the Diocese of Youngstown, acquire, develop, and maintain devices, information and communication resources, systems, and networks as a part of our mission to promote excellence in education. The following policy aims to ensure that safety and privacy are regarded and students' educational experiences are enhanced through the use of technology. It is the belief of the Diocese that students' productivity, efficiency, effectiveness, creativity, and the preparation for future studies and endeavors is achieved through innovative practices while using technology.

Protecting users and school resources requires respectful, moral, and ethical behavior characteristic of the teachings and principles of the Roman Catholic Church. This policy specifies the expectations that allow for a safe, and courteous environment, where academic integrity is honored, and respectful behavior is demonstrated in regard to communication with members, and the use of school devices, resources, and the components of the network, both locally and globally. The policy also addresses legal responsibilities of members** and institutions.

Although no set of policies and procedures can state rules to cover all possible situations, the schools in the Diocese make efforts to protect the users and its system through educating students about Internet safety and by using firewalls and filtering software. We are in compliance with the *Child Internet Protection Act and The Protecting Children in the 21st Century Act*. However, no system or network is considered full-proof.

Important Considerations

- Technology resources are to be used for educational purposes only.
- Local school's policies, related Diocesan policies, and the Student Code of Conduct concurrently apply.
- Users are subject to legal requirements as well. (See link to Ohio Revised Code §§ [2917.21\(A\)](#), [2913.01\(Y\)](#))
- The policy applies to access to the Internet through the school network whether equipment is owned by the school *or the student or student's family*.
- The policy applies to access to the Internet with personally owned devices with personal data plans (i.e. 4G and 5G networks).
- Students are responsible for all activity performed using *a personal login or account, whether or not they were the user*. Therefore, students must take care to *safeguard passwords* and follow procedures. If students become aware of, or suspect any breach of an account, they must notify a teacher, administrator, or technology coordinator of the suspected breach.
- In some instances, the policy applies to technology resources whether or not on school property. (See the section: Violations of the Acceptable Use Policy)
- Students are to refrain from posting material on social media that may adversely impact school operations, and/ or disrupt the school environment.
- Students and a parent or guardian, as stated, are required to sign the Acceptable Use Policy Agreement in order to agree with compliance of the code of practice.
- The use of school systems and equipment is a privilege and use may be revoked by an administrator, technology coordinator, or other designated school official for misuse or violation of the policy.
